

A world of difference is a world inspired.

Inspired to reduce our environmental impact through sustainable business practices and to provide innovative customer solutions.

By installing 300 kWp of our Barloworld Power solar PV solutions at Equipment operations in Isando, the difference we make:

- 47 237 kWh of renewable power produced per month.
- Estimated R793 590 saving on our energy bill annually.
- 594 tonnes of carbon emissions saved every year.

It is not just innovative solutions we see, but rather the difference to sustainability we can make with them.

Perspective makes a world of differences. And so do we.
